

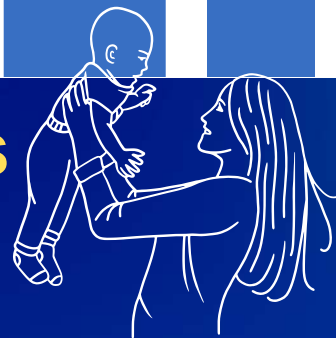

Mapping collaborative pathways for disaster recovery: a focus on women and children

The widespread impacts of disasters are well known—but typically these impacts vary for different population groups. This presentation will highlight some of the unique challenges for adult females as well as children and young people. We will include findings from research conducted in Australia and from systematic reviews of the international literature about long term disaster mental health impacts. The clinical implications of these gender and age differences will be explored through the lens of treatment and management approaches trialled in the Australian context. Opportunities for collaborative partnerships in these domains will be identified.

Lisa Gibbs, Professor, Melbourne School of Population and Global Health (and the Centre for Disaster Management and Public Safety), University of Melbourne, Australia

Lisa Gibbs leads a major disaster research program at the University of Melbourne, Australia which has influenced disaster recovery approaches internationally. Her work focuses on risk and protective factors for health and wellbeing following disaster exposure for individuals and affected communities. She is an expert contributor to many international collaborations including the Asia Pacific Disaster Mental Health Network.

Jane Nursey, Head of Clinical Services, Phoenix Australia: Centre for Posttraumatic Mental Health

Jane Nursey is a registered Clinical Neuropsychologist with 30 years' experience in the field of posttraumatic mental health. Jane develops and implements specialist clinical treatment and training programs in trauma related mental health to support individuals, communities and organisations impacted by trauma.

日時：2023年3月9日(木) 10:05～11:05

司会：大谷順子（人間科学研究科 教授）

会場：大阪大学吹田キャンパス

人間科学部ユメヌホール（東館207）

本セミナーは The Osaka – Melbourne Joint Research Workshops Fund 2022
（大阪大学PI 大谷順子、メルボルン大学PI Lisa Gibbs、事務局 Paola Cavaliere）
による国際合同ワークショップの一部を公開するものです

主催：大阪大学大学院人間科学研究科 附属 未来共創センター
